

Evidence-Based Intervention for Children with Speech Sound Disorders

By Dr Caroline Bowen

A one day workshop in AUCKLAND on Monday 26th February 2018

Registration 8.30am for 9.00am start; concludes at 4.45pm

Intended Participants

This 1-day Continuing Professional Development (CPD) event is designed for experienced through to novice Speech-Language Pathologists/Speech and Language Therapists, and Students.

Readings and Resources

Readings and resources are on the CPD Resources tab of www.speech-language-therapy.com. Bowen (2015) is not 'required' reading for this event, but page numbers in it will be cited in the presentation.

Learning Objectives

Following this event participants will be able to:

- Select and implement core assessment procedures so as to differentially diagnose children's SSD
- Choose an appropriate intervention approach or approaches, based on assessment findings
- Identify optimal targets and goals within those approaches
- Implement the approaches
- Consider how some therapies might be modified, where necessary, to suit clinical conditions that do not match the 'research conditions' within which the therapy was evaluated

Content and Format

The range of evidence-based and/or theoretically sound intervention approaches SLPs/SLTs employ to work with children with SSD is extensive. They include: Auditory Input Therapy / Naturalistic Intervention, Core Vocabulary Therapy, the Cycles Phonological Patterns Approach, Dynamic Temporal and Tactile Cueing, Imagery Therapy, Integral Stimulation, Metaphon, Parents and Children Together (PACT), Perceptually based intervention, Phoneme Awareness Intervention, Phonemic Intervention including four minimal pair approaches, Phonetic Intervention / Articulation Therapy, Psycholinguistic Intervention, Rapid Syllable Transition Training (ReST), Stimulability Therapy, The Multisensory Approach, The Nuffield Centre Dyspraxia Programme, and Vowel Remediation. These approaches are described in detail in Bowen (2015). There are too many to cover in detail in one day. However, this workshop will cover in as much depth as possible, evidence-based intervention approaches for children with phonemic, phonetic, perceptual, and motoric (Childhood Apraxia of Speech) difficulties.

About Dr Caroline Bowen

Known for her www.speech-language-therapy.com website and her interest in Children's Speech Sound Disorders, Dr Caroline Bowen practiced in Australia as a clinical speech-language pathologist for over 40 years, and for the 10 years from 2005 to 2014 travelled worldwide to present CPD events for SLPs/SLTs. Using her 70th birthday in December 2014 as a sign to slow down and reduce her workload, she now offers just 5 CPD events, which she will consider presenting anywhere in the world. She has on-going appointments as an Honorary Associate in Linguistics at Macquarie University in Australia and as an Honorary Research Fellow in Speech-Language Pathology at the University of KwaZulu-Natal in South Africa.
